

XSTRICE

FOR AN EVERLASTING CHILL

1

Full Xtra Ice sheet has 24 cells. To make smaller sheets, cut evenly between cells. Best usable sheet sizes are 8, 4 and 2 cells.

2

Immerse Xtra Ice sheet completely under water.

3

While submerged, scrunch in hands for several minutes to completely absorb water. Be patient, we promise it works.

4

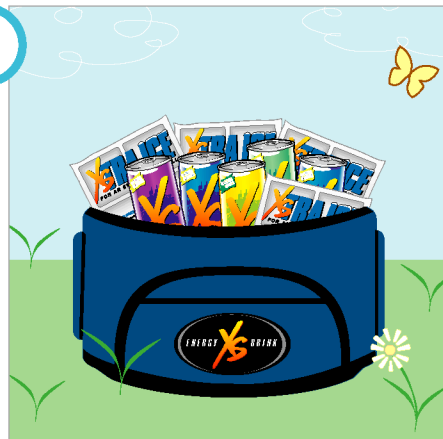

When cells have expanded to their full capacity, remove from water.

5

Place Xtra Ice sheets into freezer for up to 12 hours for best results or until completely frozen.

6

Use Xtra Ice sheets in any cooler to keep your Xtra Energy Drink cold all day. Sheets are reusable, just put back in the freezer after use.
